

# What can go in the Bokashi Bran® bucket?

Fruit & Vegetables

Coffee grinds & tea bags

Left over cooked food

White serviettes

Eggs and egg shells

Cheese and dairy

Fish and chicken bones

Anything organic

## Keep out!

Excessive oil

Left over salad dressing is fine

Excessive liquid

Drain off as much liquid as you can before adding to your bucket

Food already smelling

If you add food that already smells, your bin will smell. Tomatoes growing fungi is fine.

## Only 3 things can go wrong

- Not using enough authentic Bokashi Bran®. Not all bokashi is made equal. Without bokashi, the food waste will putrify not ferment.
- Not keeping your bin sealed properly. There will be too much oxygen.
- Adding rotten or smelly food in your bin. We can't bring things back from the dead.

Authentic
